ilker-h.com | github.com/ilker-h | linkedin.com/in/ilkerhadzhalaran

Skills

Frontend
Angular, JavaScript, TypeScript, HTML, CSS, RxJS, Bootstrap, Angular Material, Jasmine/Karma,

Backend
C#, ASP.NET Core (Entity Framework, ASP.NET Core Identity), Java, Spring Boot, C++, NodeJS, Firebase, Python, PHP

Database
MongoDB (& Mongoose), MySQL, PostgreSQL, MS SQL Server, SSMS, Azure SQL

DevOps & CI/CD
Azure, Docker, OpenShift, Jenkins, IBM uDeploy, TeamCity, Artifactory, SonarQube, Snyk, Black Duck, Batch/Shell Scripts

Tools
Visual Studio, VS Code, IntelliJ, NPM, NuGet, Git, GitHub, Jira, Bitbucket, Confluence, Postman, Chrome DevTools, phpMyAdmin

Education

McMaster University
Bachelor of Technology in Automation Engineering (Co-op)
Graduated Dec, 2020 | Hamilton, ON

Co-op Work Completed
28 Months Full-time at 4 Companies

Included
Certificate in Business Management

Experience

Software Developer (Contract) • TD Bank
CRLR Team | Dec, 2024 – Oct, 2025 (11 mo) | Toronto, ON

- Worked on a fraud data and analytics platform where I gathered business requirements from BSAs and POs, collaborated with data engineers (ETL) on data design, and resolved issues raised by QAs.
- Built 20+ Business Intelligence report dashboards using Angular and AG Grid, which helped business users combat fraud and other crime.
- Wrote and optimized complex SQL queries for Azure SQL APIs, and developed backend services in Java/Spring Boot.
- Completed the setup, configuration and integration of SonarQube and Karma into two Angular codebases, both locally and through Jenkins.
- Used Jenkins pipelines to deploy Dockerized builds to Azure Cloud and configured pipelines using batch & shell scripts. Was responsible for generating SonarQube test coverage reports for two codebases.
- Implemented 110+ bug fixes, wrote unit tests in Jasmine/Karma, updated outdated packages, and wrote 50+ pages of documentation.

Software Developer (Full-time) • Citigroup *Manager Testimonial*
Velocity Team | Jul, 2022 – May, 2024 (1 yr 11 mo) | Mississauga, ON

- Worked on sizeable enterprise codebase for a trading platform. Used Angular, ASP.NET Core (C#), and Caplin Liberator.
- Work included building new features (e.g., modernizing legacy screens, creating Angular UI components, updating C# trading calculations, AG Grid customizations), fixing bugs & debugging data flow issues, reducing technical debt, developing unit tests, and more.
- Led releases to production using TeamCity, IBM uDeploy, Jenkins and Docker/OpenShift. Coordinated with teams globally (e.g., QA, Support, BA, Development, Change Management, and more).
- Resolved time-sensitive issues, such as users' Support queries, production issues, dependency vulnerabilities, etc.

OneBook Team | Jul, 2021 – Jun, 2022 (1 yr) | Mississauga, ON

- Worked on a new book building platform using Angular, wrote tests in Jasmine/Karma, and interacted with data using Java/Spring Boot and MongoDB.
- Major Project: Created 2900+ line Angular feature to streamline process of updating user permissions. Business users can now use a GUI instead of having to ask developers to update data manually.
- Joined the team a few months before their first software release and completed 50+ improvements and bug fixes.

Education (Continued)

Relevant University Courses

Object-Oriented Programming, Internet Technologies & Databases, Quality Control and Assurance, System Specification & Design, C++ Programming, Artificial Intelligence & Machine Learning

Experience (Continued)

Software Developer (Internship) • McMaster University's MMRI

May – Aug, 2020 (4 mo) | Hamilton, ON | Manager Testimonial

- Created data visualization, analytics, and test software for FANUC manufacturing machines using MongoDB, ExpressJS, Angular, NodeJS (MEAN), FANUC's MT-Linki API, and third-party libraries.
- Designed app architecture, used Atlassian Suite workflows, and performed DevOps duties, including managing deployments.

Additional Skills

Architecture & Codebase Management

REST API, State Management, MVC, MVVM, Dependency Management, Authentication, Data Structures & Algorithms

Software Design, Diagrams & Requirements Analysis

Figma & InVision Mockups, Enterprise Architect design tool, SRS Documentation, project requirements, cost estimation, UML Diagrams (e.g., Use Case, Activity, Sequence, Affinity, Class, State Machine, etc.)

Libraries

AG Grid, SignalR/websockets, PDF Viewer, Cron Jobs, Nodemailer, dotenv, Pkg

Machine Learning

TensorFlow, Keras, NumPy, pandas, scikit-learn, Matplotlib, Conda, Anaconda Navigator, Jupyter Notebook, MATLAB

Other

Linux & Windows Environments, Unity Game Engine (C#), 3D Modelling (AutoCAD, SolidWorks), WordPress Website Design

Personal Projects

QuickPass Password Manager | *vimeo.com/381806818*

- Designed and developed a fully responsive Angular-Firebase web app that helps a user manage their passwords.

MentorConnect: Networking App | *vimeo.com/957525974*

- Built a web app for career development and networking that helps connect mentors and mentees.
- Made with Angular, ASP.NET, MS SQL Server, and MS Azure.

Portfolio Manager (Hackathon) | *vimeo.com/593492344*

- Created an Angular-Spring Boot app that helps a user manage their financial portfolio, with real-time data from Yahoo Finance API.

Capstone Project: Virtual Reality (VR) Tour of a University Lab | *vimeo.com/495898892*

- An app that lets the user explore the equipment and machines in McMaster University's Learning Factory in a 3D environment.
- Made with Unity game engine, Angular and Firebase.

9 University Software Assignments | *vimeo.com/415729502*

- A showcase of 9 different programming assignments I completed in university. These were individual assignments, not group work.
- Made with PHP, MySQL, HTML, and CSS.

Online Courses & Certificates

- **Citigroup: Engineering Level 1 Technical Certification** (20 hr)
  - Topics: cloud architecture, Docker and internal DevOps tools
- **ASP.NET Core & Angular** by Neil Cummings (35 hr) – *Certificate*
- **Angular** by Maximilian Schwarzmüller (28 hr) – *Certificate*
- **MEAN Stack (MongoDB, ExpressJS, Angular, NodeJS)** by Maximilian Schwarzmüller (12.5 hr) – *Certificate*
- **WPF** by Mark Watkins (13 hr) – *Certificate*
